ABOUT ME

I currently work in Austin as a Art Director putting my skills to the test developing creative solutions with interactive, social, and mobile technologies for B-to-B and B-to-C clients.

- **Modern Renaissance Man** – Experience in graphic arts, print, web, UX and mobile. I'm proficient in Adobe Creative Suite and can also play a mean game of table tennis, if you're into that sort of thing.
- **Obsessive** – Well within reason. I just like a UI/website/brochure/etc. to be as good as possible. Time permitting, of course. I know the world is full of deadlines.
- **Nerd** – Okay, not a plus for everyone, but hear me out. I love the web, tech things and computers—and what makes them tick. I constantly look for new ways to execute my work, new experiences, new sites and new methodologies.
